Got data? Yes! (the relevant, actionable kind)

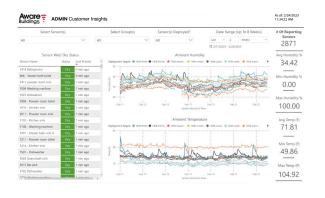

Insurance companies run on data.

Data provides valuable insights to better understand and price your risk premiums.

Aware's Leak Detection Solution gives our customers lots of good data and analytics which they can share with their insurer, and serves as a good starting point when talking about their building's premiums and deductibles.

Our reports are a great way to demonstrate your building's leak history and let your insurer know what concrete steps your residents' association is taking to catch leaks early and mitigate water damage risk.

Best of all, it's simple to use, retro-fittable and affordable!
